## Education

<b>UET Taxila</b>	August 2022 – August 2026
Bachelor of Science in Computer Science	GPA: 3.5/4.0
<b>Relevant Coursework:</b> Cloud Computing, Distributed Database Systems, Foundations of Algorithms	
<b>FG Degree College Wah Cantt</b>	July 2020 – Mar 2022
Faculty of Computer Science (FCS)	Grade: 98%

## Skills

**Languages:** Python, Java, JavaScript, C, C++, HTML/CSS

**Databases:** MySQL, PostgreSQL, MongoDB

**Frameworks:** Flask, Django, Node.js, React Native, TensorFlow, PyTorch, Bootstrap

**Tools & Technologies:** Git, Docker, AWS, Heroku

## Experience

**Meta Wibe** March 2024 - Present : Full Stack Web Dev

- Working as a Full Stack Developer, building and maintaining web applications using Next.js for server-side rendering.
- Worked on three web applications targeting customers, selling vendors, and admin users; built 50+ RESTful APIs with functionalities such as login/sign up, view a product, add a product to cart, checkout the order, etc.

**Symbia Canada** Nov 2022 - Jan 2024 : Mobile App Developer

- Worked remotely as a Mobile App Developer, building and maintaining cross-platform applications for field operations.
- Developed and enhanced mobile features using React Native and Flutter, ensuring consistent performance across Android devices.

**BeWhoop** June 2022 – October : 2022 Intern

- Worked as an Intern, contributing to feature development in real-world codebases.
- Integrated tools like Amplitude for event tracking and analytics in React Native and Node.js environments.

## Projects

**Job Hunt** (<https://github.com/abdullazmat/job-hunt>)

April 2025 – May 2025

Tech Stack: MERN Stack, Multer, Cloudinary

- Built with the MERN stack, it uses Multer for handling file uploads and Cloudinary for storing company logos or applicant files.
- The app supports secure authentication, dynamic job listings, and role-based access for both companies and applicants.

**Medium Article Scrapper** (<https://github.com/abdullazmat/Flask-Medium-Scrapper>)

Jan 2025 – Feb 2025

Tech Stack: Flask, SQL Alchemy, PostgreSQL, Python

- Built with Flask, it uses web scraping tools like requests and BeautifulSoup to extract article content directly from Medium.

**Wall Hub** (<https://github.com/abdullazmat/WallHub>)

Nov 2024 – Dec 2024

Tech Stack: React Native, NEXT JS, TypeScript

- Fetches wallpapers through an API, allowing users to browse, save, and like high-quality wallpapers seamlessly.
